Solar energy is a long lasting source (0)..of.. energy, and it can be used almost anywhere. To generate solar energy, we only need (9)..... cells and the sun. Solar cells can easily be installed on house roofs , so we don't need any new space. Compared to other (10)..... sources, they also possess many advantages: wind and water power rely on turbines which are noisy, (11)..... and which take up large space. Solar cells are totally silent and (12)..... .As they have no moving parts, they require little maintenance and have a long lifetime.

(maintenance: sự bảo trì)

II. Read the text and answer the questions:(1pt)

Hello, class. Today I'd like to tell you about two energy sources. They are non-renewable sources and renewable sources. Non-renewable sources are coal, oil and natural gas. We can use these sources to produce energy. They are cheap and easy to use. People use them a lot. But they are very limited and will run out soon. Renewable sources come from the sun, wind or water. When energy comes from the sun, we call it solar energy. Wind energy comes from the wind, and hydro energy comes from water. Renewable sources are available, clean and safe to use. But they are expensive to produce. In the future we will rely more on renewable energy sources. They are better for the environment and they will not run out.
